TO WHOM IT MAY CONCERN

SURVIVAL LIQUID TYRE SEALANT

We have had Survival installed into the tyres of the Council's Trucks, Graders and other equipment, almost one year ago.

To date, we have had no problem with the use or performance of this product. Survival – in fact, out-performed claims made by the manufacturer in certain applications.

The use of Survival resulted in a saving of approximately 70% (?) in tyre repair and replacement cost during the current financial year.

We are of the opinion that industry – in general, will benefit financially once the real value of Survival is recognized as a cost saving tool.

Survival's management further honoured their commitment as far as technical back up and service is concerned.

Based on our experience – we recommend the use of Survival to any person or institution who may have the need for such a product.

Regards

H. OELOFSE
