Dear Mr Placido

I have been using Survival SP 2000 for truck & trailer type tyres for the last five years. During this time I haven't had any punctures or lost a tyre due to heat separations. Survival kept my tyre pressure stable and it definitely increased my tyre life. I have recapped my virgin casings thru Maxi Prest and I insisted that the product must be re inserted. Survival did not cause any effect on the recap ability of my casings. I will recommend the use of Survival to all truck owners.

Best Regards
