Survival Tyre Safety / Yellow Metal Spares  
Pretoria  
South Africa

Dear: Jeff

Re: Letter of Recommendation.

We at C.A.T.S Plant hire have been using Survival Liquid Tyre Sealant in our TLB's and Graders since July 2010. In your initial presentations you presented that there would be a substantial amount of money saved per month per Machine based on the fact that you would reduce the break downs as a result of punctures and at the same time extend tyre life.

In our experience of nearly the last year we have found the following:

- ◆ We have not had any punctures on any of the machines installed with Survival.
- ◆ We have saved substantial amounts of money on breakdown labour and transport cost due to the fact that we have had no punctures since July 2010.
- ◆ We have taken all the spare rims and tyres off sites as they are no longer needed, eliminating the risk of theft and stock shrinkages which costed us thousands of Rands in the past.
- ◆ The full machine hours are being charged on a monthly basis as we have not had any deductions for down time due to punctures.

As a result of our findings we are in the process of:

- ◆ Installing Survival in all new machines purchased.
- ◆ Installing Survival in all new tyres we fit.
- ◆ Implementing Survival in the balance of our fleet.

**Directors: Managing – DL Samons Financial – PJ Samons B.Com (Wits) C.A. (S.A.)**

We would recommend the use of Survival to any Company who has machines operating in the Plant Hire, Mining or Construction Sectors due to the measurable costs we save on all tyre type machines on a monthly basis.

Thank you for your support and exceptional client service we have received.

Kind Regards
