Survival- Ultimate Tyre Solution

3 May 2011

260 Vonkprop Street

Silverton

Pretoria

Dear Marelize

Herewith a note of thanks for introducing the Survival product to us. I can recommend the use of Survival to any of your potential clients, as well as your excellent level of service.

On your recommendation we installed Survival in a 26L28 tyre that was losing more than 2 Bar of pressure per day as a result of at least 15 leaking gator repairs, the biggest cut being 9 cm.

The product sealed all the leaks with the result that we now only have to do our weekly tyre pressure check on our Caterpillar RM300 recycler.

The resultant saving for us was R14500 considering the quoted cost of R18000 excl VAT for a new 26L28 tyre, and a cost of R3500 for the Survival product.

Thank you for your assistance

Kind Regards

Pieter Gerber

Plant Manager
